

## Model RBA1655-100

### Materials & Features

Manufactured from heavy-duty type #304 stainless steel, this premium paper towel dispenser is finished in PVD Brushed Brass. The unit features a tumbler lock and a hemmed opening to prevent the tearing of paper towels. PVD coating is a premium coating process in which a solid material is vaporised and slowly layered onto a fixture. This results in a durable, versatile finish that's more environmentally friendly than traditional coating methods. Find out more at [rba.com.au/pvd](https://rba.com.au/pvd).

**For best results**, unit should be inspected and cleaned regularly as per the instructions in the RBA Product Warranty, Cleaning Care Guide, available on our websites.  
**Important:** Installation instructions and current rough-in details should be furnished with each fixture. Do not rough in without certified dimensions. Dimensions are subject to manufacturer's tolerance of +/-10mm. Due to the semi-reflective nature of PVD, colours may appear differently depending on surface shape and lighting conditions. RBA recommends viewing fixtures under the same lighting conditions where they are to be installed.
