

Model RBA8130-200-series

Materials & Feature

Designed to support the weight of clothing and towels but snap down if excessively loaded, the RBA8130-200-series is a stylish and sleek choice to help protect patient safety. Each hook is manufactured from injection moulded ABS plastic with an anti-microbial additive to protect from bacterial growth and mitigate odours.

Installation

The hook should be mounted as shown in the image (with the blind nuts on the horizontal).

For best results, unit should be inspected and cleaned regularly as per the instructions in the RBA Product Warranty, Cleaning Care Guide, available on our websites.

Important: Installation instructions and current rough-in details should be furnished with each fixture. Do not rough in without certified dimensions. Dimensions are subject to manufacturer's tolerance of +/-10mm.

Please note: While RBA takes all reasonable measures to ensure our ligature resistant products consistently perform as advertised, we do not perform load testing on every item. RBA strongly recommends all customers perform their own load testing on each item prior to installation and at regular intervals throughout the life of the product.

RBA does not offer or warrant any of our products as 'anti-ligature' as no product can be truly ligature-free. RBA will not be liable for any claims, losses or damage arising from ligature attachment to our products. It is the responsibility of the purchaser and installer to ensure supplied products are suitable for the environments they are to be installed into.
