Steri+Shield™

Defend against bacteria & grime with Steri+Shield™.

Designed with health and aged care in mind, Steri+Shield™ is a protective, hygienic barrier installed into RBA Modular Grab Rails. While traditional grab rails often have small crevices that make cleaning difficult and allow harmful microbes to proliferate, Steri+Shield's™ unique seal technology prevents the entry and buildup of bacteria and grime, ensuring the safety of users, patients and patrons.

Independent laboratory testing has demonstrated Steri+Shield™ tested to be up to 99% effective at inhibiting the bacterial growth of many common microorganisms found on high-traffic bathroom touch-points, like E. Coli and S. Aureus (staph).
